

ACHA Webinars Presents:

Tell That Special Someone About Your Special Heart

Wednesday, February 4, 2015, 7 p.m. – 8 p.m. EST

Presenters:

Ami Bhatt, MD, and Cassandra Bates

About the Webinar

Living with congenital heart defects can be challenging at times, but the greatest challenge often comes in sharing personal information about yourself with others, whether new loved ones or good friends. Join us for a special chat to share and learn about the science and the emotion involved when sharing matters of the heart. You won't want to miss this webinar—register today!

About the Speakers

Dr. Ami Bhatt is Director of the Adolescent and Adult Congenital Heart Disease Center at Massachusetts General Hospital and faculty at Harvard Medical School. Her research and program focus on patient experience in the healthcare system, the emotional and psychiatric effects of lifelong diagnoses, and empowering patients and physicians to focus on health and wellness for congenital heart individuals and their loved ones.

Cassandra Bates was born with tetralogy of Fallot and is an ACHA Heart to Heart Ambassador. She is an avid long-distance backpacker and endurance cyclist, with two crazy cats, fish and a husband who lovingly puts up with her “not to be slowed down” attitude. As an Ambassador, Cassandra encourages others to live life fully and embrace their congenital heart condition and not be ruled by it.

About the Adult Congenital Heart Association

The mission of the Adult Congenital Heart Association (ACHA) is to improve and extend the lives of the millions born with heart defects through education, advocacy and the promotion of research. If you would like to find out more about our programming, visit our website, www.achaheart.org. To support ACHA's mission to improve and prolong the lives of heart defect survivors, you can make a donation on our website.

This webinar was made possible in part by unrestricted educational grants from Actelion Pharmaceuticals US, Inc., Gilead Sciences, and St. Jude Medical Foundation.
